

**Multiple-Choice Questions:**

1. True or false? Bundler, RVM, and Vagrant all help with configuration management.
  - a. True
  - b. False
  
2. Which of the following does not help with Rails development environment configuration management?
  - a. Bundler
  - b. GitHub
  - c. RVM
  - d. Vagrant
  - e. None of the above (i.e., all help with configuration management)

**Solutions:**

1. a
2. b (e might also be acceptable because an argument could be made...)
