HW2: Completing the First Iteration

In this homework, you will complete your first iteration on the course project, which began in HW1. Regular-productivity work will be planned and assigned to students on the day that HW2 is officially assigned (Wed 15 Feb).

To submit HW2, one member of your team must tag your team's relevant revision of the code (i.e., in Eclipse_Project/trunk) as "HW2".

Don't forget that, in the event that you find that you've bitten off more regular work than expected, you may attempt to renegotiate your regular work assignment in class on Wed 22 Feb.

Lastly, don't forget to be on the lookout for Above and Beyond opportunities. For instance, as you're working on you project, you may get ideas for little "extras" that you could add to the project. Such "extras" might make good A&B work items. As usual, it is wise to negotiate A&B work with me first, before proceeding with the work.
