Requirements for the Major Field Test in CS

Before you can take the Major Field Test, there are three items to which you must attend:

1. You must bring to class a laptop on which to take the test. The laptop must meet the following system requirements:

   https://www.ets.org/mft/test_administration/requirements/

   If this item poses a problem for you, let me know ASAP.

2. Prior to the testing days, you must execute on your laptop the "MFT System Check" from the following webpage:

   http://www.mft-ets.org/

   Your laptop must pass the checks. (Note that the bandwidth requirements are specific to the classroom.)

3. Prior to the testing days, you must download onto your laptop the ETS Testing Browser, also from that webpage (http://www.mft-ets.org/).
