Chapter 1 Quiz

1. [6pts] What 3 things does great software development deliver? (Hint: These things were also described in the 3 principles at the end of the chapter.)

2.	[8pts] What is "Big Bang" development, and what is iterative development? How are they different

3.	[6pts] What is the solve that problem	ne problem with m?	n "Big Bang	g" developmen	t that iteratio	n solves? W	hy does i	teration

4.	[1pts] What length of iteration should you shoot for (in days)?
5.	[1pts] Were those calendar days or working days?
6.	[3pts] Fill in the blanks. Every iteration results in <u>(a)</u> and gathers <u>(b)</u> from the <u>(c)</u> every step of the way. (Hint: Item a is the most important thing produced by developers in an iteration, and is two words.)
